EDUCATION

Rochester Institute of Technology, Dubai | Dubai, U.A.E. **2025 – 2028**
B.Sc. in Computing & Information Technologies, Minor in Ethics | CGPA: 3.68/4.0

- Courses: Web & mobile development, software development, data structures & algorithms, networking
- Honors: Dean's List, Academic Scholarship
- Events Coordinator for Student Government 2026, serving 3000+ students across 6+ events

TECHNICAL SKILLS

Languages (ordered by proficiency): HTML/CSS/JavaScript, Java, Spring Boot, React.js, Python, MySQL
Tools & Frameworks: Git/Version Control, Vite, Node.js, Pytest, Figma, WordPress
Languages: English (Fluent), Arabic (Professional)

RELEVANT EXPERIENCE

Develop for Good | San Francisco, Remote **May 2026 – Aug. 2026**
Software Engineer Fellow

- Architecting a learning platform in a multidisciplinary team of designers & engineers to provide workforce readiness resources for **400+** underserved students with *Make An Impact Foundation*, streamlining delivery of high-impact educational content through a scalable, user-centric web-based solution

Hot Rides Customs Garage LLC | Dubai, Hybrid **2024 – Present**
Business Strategy & Full-Stack Systems Developer

- Engineering and deploying to **Render** a secure, internal automated **Job Card & Invoice Generator** system using **MySQL**, **Node.js**, and **React**, improving operational efficiency and reducing admin processing time
- Built a commercial landing page to enhance brand visibility and engagement, deployed on **Vercel**

Tabby | Remote **2024 – 2025**
Regression UX Tester on Testlio

- Comprehensively tested *Tabby* Android applications, documenting bugs using tracking frameworks for English and Arabic versions, upholding high quality-assurance standards

PROJECTS & LEADERSHIP

Immersive Digital Twin Lite for Evacuation Training | *RIT Dubai Laboratory* **2026**

- Exploring autonomous agent behavior and dynamic hazard modeling within game engine frameworks
- Deploying virtual sensor pipelines to stream and log real-time simulation analytics
- Utilizing LLM APIs to translate complex simulation data into natural language coaching
- Conducting user studies to analyze human-AI trust and simulation performance; co-authoring a research paper for publication in a leading HCI or simulation conference

Best Overall Game | *Endless Studios* **2024**
Game Designer & Sprite Artist

- Collaborated in a 6-month program to develop the **"Best Overall Game"** for Capstone cohort #7, utilizing **Git** for version control and contributing to C# logic through iterative testing

LEADERSHIP & ACHIEVEMENTS

DesignAthon 2025 | Front-End Competition **2025**

- Awarded 1st Place in a competitive front-end design challenge

Scrapyard Sharjah by Hack Club | Global Satellite Hackathon **2024**

- Recognized as Most Valuable Person for coordinating the satellite hackathon for 30+ competitors aged 12-18
